## Intrasense unveils the latest version of Myrian® at CHIMA Chinese tradeshow

Intrasense (FR0011179886 - ALINS), specialist in medical imaging software solutions, announces the worldwide launching of the latest version of Myrian® during the hospital information systems tradeshow ([CHIMA](#)), held from July 12 to 15 2018 in Guiyang (China).

Myrian® 2.4 includes new exclusive diagnosis tools, for breast and colon in particular. Now available on a full-web mode, these tools are seamless integrable within any health information system.

### Enriched clinical features, new algorithms

A new application dedicated to colon enables more effective virtual colonoscopies: based on unique image processing technologies developed by Intrasense, such as 3D image registration and segmentation, it also includes a « bowel-cleansing » feature, optimizing reading.

A new « breast MRI » characterization algorithm for lesions makes malignant tumors diagnosis much more reliable, to avoid « false-positive » results.

*« This year, Myrian® is enriched of exclusive new clinical features, making diagnosis more reliable and still optimizing time for analysis. »* comments Philippe Michelon, Product Director at Intrasense. *« With « Quick Patient » functions, essential assistance tools to diagnosis are always within reach for practitioner, in the natural workflow of exam reading. »*

### Myrian® available on full-web mode for large-scale deployment

Partnerships concluded in early 2018 with 12 Sigma Technologies, MinFound or Evolucare, have allowed to perfect integration and deployment capabilities of [Myrian® Imaging Layer](#) offer within any health system.

*« This new version makes easier large-scale deployment of all Myrian® tools for image interpretation: they are now available on full-web mode, enabling addressing new business cases, required for Myrian® Imaging Layer deployment on large-scale organizations. »* concludes Philippe Michelon.

The CHIMA tradeshow will have been the occasion of Myrian® 2.4 launching in China, a [huge potential market](#), and to meet Chinese actors of health systems with [Evolucare](#), the brand new French partner of Intrasense.

## About Intrasense

Founded in 2004, Intrasense develops and markets a unique medical device called Myrian®, a software platform that facilitates diagnosis, decision-making and therapeutic follow-up and makes them more secure. Thanks to Myrian®, more than 800 health institutions spread over 40 countries use a unique and integrated platform supporting all types of imaging modalities (MRI, scanner...). Enriched with expert clinical modules dedicated to specific pathologies, Myrian® also provides a universal image treatment solution that can be fully integrated in any health information system. Intrasense includes 40 employees among which 20 are dedicated to Research & Development. Intrasense has been labelled 'innovative company' by the BPI and invested more than 10 million euros in Research & Development since its creation.
